MEDIA RELEASE

CALYPTECH ADDS DSP AND RF/ANALOG SERVICES

MELBOURNE, Victoria. Calyptech, a leading Australian design solutions provider, has added Digital Signal Processing and RF/Analog design services to its existing high speed digital design services.

John Maher, CEO of Calyptech, stated that "... Calyptech has taken advantage of an opportunity to expand its range of services, and is now well positioned to provide complete system solutions for wireless and xDSL applications, complementing our existing expertise in SONET/SDH, ATM and protocol development. Beyond telecommunications, we expect the addition of this world-class expertise to drive Calyptech's expansion into multimedia and medical technology applications."

About Calyptech

Calyptech (www.calyptech.com) is a leading provider of innovative technological solutions. Offering both customised products and design services, Calyptech have a proven track record in addressing difficult technical challenges in a range of telecommunications industry segments globally, including semiconductor, networking and data security.

Focused on customer success, Calyptech work in close partnership with their diverse client base, applying world class expertise in Radio Frequency, Analog, Digital Signal Processing, and high speed digital systems design, in order to deliver the most optimal solutions, ensuring reduced risk and faster time-to-market for the client.
