MEDIA RELEASE

CALYPTTECH PARTNERS WITH XILINX VIA ALLIANCECORE PROGRAM

MELBOURNE, Victoria. – Calyptech, a leading Australian provider of innovative technological solutions, has joined Xilinx’s AllianceCORE program.

Xilinx, today’s leading provider of programmable logic solutions, designed the AllianceCORE program in order to produce a broad range of industry-standard solutions dedicated for use in Xilinx programmable logic.

“Xilinx takes an active role with its partners in the process of productizing AllianceCORE products. Because the process is so involved, we work closely with our partners to select the right cores first, which helps raise the quality and usability of the cores that are offered” stated Mark Bowlby, Xilinx AllianceCORE Program Manager. “Calyptech have significant expertise in telecommunications technology and have implemented a range of complex telecoms test equipment. This background enables them to produce impressive IP Cores.”

“Our current IP offering on the AllianceCORE program is a CRC-32 IP Core. There are two versions; CORE-CRC-128 and CORE-CRC-256. These may be used to provide error checking codes onto packet data to be transmitted, and to validate the contents of received data packets” stated Shane Tonissen, Calyptech’s Chief Technology Officer. “Currently supported data rates are 10Gb/s and 40Gb/s. This core is part of our integrated SONET/SDH solution for high speed telecommunications systems.”

About Calyptech

Calyptech (www.calyptech.com) is a leading provider of innovative technological solutions.

Offering both customised products and design services, Calyptech have a proven track record in addressing difficult technical challenges in a range of telecommunications industry segments globally, including semiconductor, networking and data security.

Focused on customer success, Calyptech work in close partnership with their diverse client base, applying world class expertise in Radio Frequency, Analog, Digital Signal Processing, and high speed digital systems design, in order to deliver the most optimal solutions, ensuring reduced risk and faster time-to-market for the client.
